READING

Q1-A: Read the text and answer the following questions:

The bright colours of birds, the call of monkeys and the hum of insects are common sights and sounds in a tropical rainforest. Rainforests grow near the Equator, where it is always warm and wet – the perfect habitat for plants and animals. In Papua New Guinea, scientists have just discovered a new rainforest. It has existed for many thousands of years at the top of a mountain. It has always been very difficult to reach. Even the people who live on the slopes of Mount Bosavi have rarely visited this hidden rainforest. It is very high up, at over 2,500 meters above sea level, and it is hidden inside the hole of a huge volcano. In 2009 CE, an international team of scientists visited Mount Bosavi and discovered an amazing world of plants and animals there.

1- What can you observe in a tropical rainforest?

.....

2- Where do rainforests grow?

.....

3- Why do rainforests considered a perfect habitat for plants and animals?

.....

4- What did the scientists discover in Papua New Guinea?

.....

5- How high is the hidden rainforest?

.....

6- The underlined pronoun

A. 'it' line 3 refers to:

B. 'it' line 5 refers to:

Q1-B: Read the text and answer the following questions:

The value of emeralds has been known for centuries and even in ancient times. The Aztecs in Mexico and the Incas in Peru held them in high regard. However, the oldest emeralds were found in Egypt, near the Red Sea. Many Egyptian pharaohs took emeralds from the mines there. The mines were actually known as 'Cleopatra's mines' because Cleopatra liked to wear the stones. She wore jewellery made from emeralds and decorated many ornaments with the jewel. Cleopatra presented noble visitors with carved emerald sculptures that looked like the Queen.

The Ancient Egyptians believed that emeralds were not only beautiful but were also able to cure disease. Historians know that these emeralds were a lighter colour green than many emeralds found today, but they were highly valued in Ancient Egypt. There were many emeralds in these mines. In later times, the Romans and the Turks took emeralds from these mines, so overall the 'Cleopatra mines' were in use for over 1,500 years! When these mines were found again in the early nineteenth century, there were no emeralds left. There are now no more emeralds left in Egypt, but the Ancient Egyptian era represents the beginning of the jewel's long history. Now, the majority of the world's emeralds can be found in Colombia.

1- Where did people find the oldest emeralds?

.....

2- What were the mines called in ancient Egypt? Why?

.....

3- What did Cleopatra presented her visitors?

.....

- 4- What did ancient Egyptians believe about emeralds?
.....
- 5- What was the color of the emeralds that were found in Egypt?
.....
- 6- Where can emeralds be found these days?
.....
