Q1: Read the text and answer the following questions:

Dr. Madi works at King Abdullah University Hospital in Irbid. It's the biggest hospital in the north of Jordan. He tells us about a busy day at the hospital. "This morning I've talked to the night doctors and nurses about the new patients. Some of the patients arrived at night, so I haven't seen them before. It's really important to talk to the patients, too. I've talked to five patients this morning. I've written down all of the important information about their health problems in their notes. After I've talked to the patients, I sometimes do blood tests. The results of the tests help me to decide what medicine to give. I've done lots of other things this morning, too! I've talked to the patients' families and I've answered their questions. Some of the patients can go home. I've checked that the patients have help when they go home. I've written prescriptions so that they can get their medicine."

- 1- When do some of the patients arrive?
- 2- How many patients has the doctor talked to this morning?
- 3- What information has the doctor written down?
- 4- Why does the doctor sometimes do blood tests?
- 5- The underlined pronouns refer to:
