Read the following comprehension and answer the questions:

Banks are places where people can keep their money. Most people use banks to save money in their savings accounts and to pay money from their checking accounts. Today, when a person earns money from their job, their paycheck is often electronically deposited (put) into their savings or checking account. Then, he or she can pay their bills by writing checks from their checking accounts or pay online where their bills are electronically connected to their bank accounts. Banks also give loans to people. People may use the bank's money to buy new houses, cars, or to start businesses among other reasons. The bank makes money from lending by charging interest. In other words, people have to pay back more than they borrowed. This amount depends on how risky the bank thinks the borrower is and how fast the loan is paid back among other things.

1.) How much "interest" do borrowers have to pay?

- A.) Most borrowers don't have to pay interest.
- B.) Everyone pays the same amount of interest.
- C. The story doesn't tell.
- D.) It depends on a lot of things.

2.) What do people do with bank's money?

- A.) Buy houses
- B.) Buy Cars
- C.) Start Businesses
- D.) All of the above

3.) How do banks make money?

- A.) By saving customer deposits.
- B.) Charging interest to those they lend to.
- C.) By having a lot of accounts.
- D.) Electronically.

4.) How does "interest" work?

- A.) Banks pay people more money than they borrowed.
- B.) Banks require people to pay back money they borrowed very quickly.
- C.) Banks require people to pay back the same amount of money they borrowed.
- D.) Banks require people to pay back more money than they borrowed.

5.) What do banks NOT do?

- A.) Help people get jobs.
- B.) Provide a place where people can pay their bills from.
- C.) Provide a place where people can save their money.
- D.) Lend money to people

Read the following comprehension and answer the questions:

The blue whale is the largest living animal to have ever lived on the planet Earth. Blue Whales are way larger than the largest dinosaur that ever lived. The largest Blue Whales can grow as large as 100 feet long, which is longer than three school buses put together! Even though blue whales are huge, they eat tiny creatures known as krill. Read the following comprehension and answer the questions:

The Arctic Fox is a small fox found commonly in the arctic regions of the world. Measuring a little less than three feet in length, this fox is mottled brown in the summer and pure white in the winter. Adult foxes weigh between six and twenty pounds, though most are closer to six. Its thick fur coat helps insulate it from the freezing temperatures and windswept snow. The arctic fox is the ultimate survivor. It will eat just about anything including insects, small mammals, birds, ducks, geese, eggs, and even an occasional snowy owl. Lemmings, small mouse-like mammals, are its most common prey. In fact, when populations of lemmings crash every three or four years, so do populations of foxes. Arctic foxes will eat berries and seaweed as well. When food is scarce, arctic foxes become scavengers. The arctic fox is sometimes preyed upon by polar bears. Arctic fox vixens (female foxes) can give birth to as many as 25 kits (baby foxes) in the springtime (the largest of any carnivore). Most litters, however, contain between five and eight kits. Both male and female foxes help take care of the young. While the arctic fox is common throughout much of the Arctic region, it is exceedingly rare in the Scandinavian nations of Norway, Sweden, and Finland, where populations never recovered from severe overhunting. In addition, recent movements of the Red Fox into Arctic Fox territory, probably as a result of global warming, threaten the arctic fox population as well.

1.) Which is NOT true about the size of an Arctic Fox

Read the following comprehension and answer the questions:

Windsor Palace is the world's largest and oldest continuously inhabited castle. Occupying over 484,000 square feet, it is over 240 times the size of an average house. William the Conqueror built the first castle on the grounds between 1070 and 1086, but the castle that exists today was largely built by Edward of Windsor in 1350. Edward of Windsor authorized the construction of a new keep, a large chapel, and new fortifications. From a distance, the castle appears dominated by a massive round tower in its center. In 1475, King Edward IV authorized construction of St. George's Chapel as a cathedral and royal mausoleum. The chapel became an important destination for pilgrims in the late medieval period and is probably the most famous of the structures within Windsor Palace. During the 1500's and 1600's,

Windsor Castle was damaged as a result of various wars. In 1660, however, Charles II became interested in restoring the castle and laid out plans for "The Long Walk," a three-mile long avenue running south from the castle. Charles II also had the royal apartments and St. George's Hall rebuilt. The royal apartments were spectacular, with numerous carvings, frescoes, and tapestries. The artwork acquired during the rebuilding of Windsor Castle became known as the Royal Collection, which remains relatively unchanged today. In 1824, George IV moved into the castle and was granted 300,000 pounds to renovate Windsor Castle. The entire castle was remodeled and the architect, Jeffrey Wyattville, succeeded in blending the castle to seem like one entity rather than a collection of buildings. Wyattville raised and lowered the heights of various buildings to give them symmetry and improved the appearance and structure of others.

A surgeon can make a difference to people's lives. It is a hard job working long hours in hospitals with the mindants and nurses around you all the time. I am proud to be helping sick people to start a new life with healthy hearts. Our surgeons, modern hospitals and intensive help to make the UAE people healthier, and that cares will be good for our society and the coming generations.

My dream job

I would like to be a writer. I want to be a writer because I would love to tell stories to people, things that are inside my head, inside my heart. When I write, I feel free. I abandon my body and I fly. I travel to the world of my imagination where everything is good. There, in that world, there is no place for mean people or for sadness or for other feelings that are bad for us. Everything is so perfect that we really want to live there. I think the reason why there are so many people who don't like writing is because they don't know how to do it. But I don't believe that I could be a writer in the future. It's very hard to write books with quality.
