Ben Akintola, 30, was snowboarding in the French Alps under a clear blue sky on the last Saturday of his holiday when there was an avalanche. Ben, who started snowboarding when he was in his teens, realised he was in danger when he heard the sound of thousands of tons of snow rushing down the mountain. Avalanches can travel at speeds of 100 kilometres an hour, so Ben knew he couldn't outrun the wall of snow. He was desperately trying to get out of the path of the avalanche when it hit him with full force and knocked him unconscious. He woke much later in the middle of the night in pitch darkness. He was lying on a narrow, icy ledge. Although he was in pain, a quick check indicated that he had no broken bones. Amazingly, he still had a mobile phone signal, so he called a friend a thousand kilometres away in Britain. His friend called the French rescue services.
